APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office
Returned to applicant for correction.
Corrected application filed.
FEB 0 6 1985 under 48768
Robert F Meyer
The applicant Robert E. Meyer
14132 East Firestone Blvd. , of Santa Fe Springs Street and No. or P.O. Box No. City or Town
California 90670 , hereby make S application for permission to appropriate the public State and Zip Code No.
waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorpora-
tion; if a copartnership or association, give names of members.)
Underground
1. The source of the proposed appropriation is Underground Name of stream, lake, spring, underground or other source
······································
2. The amount of water applied for is 3.34 c.f.s. second-feet
(a) If stored in reservoir give number of acre-feet.
3. The water to be used for mining, milling & domestic Irrigation, power, mining, manufacturing, domestic, or other use. Must limit to one use.
4. If use is for:
(a) Irrigation, state number of acres to be irrigated
(b) Stockwater, state number and kinds of animals to be watered
(c) Other use (describe fully under "No. 12. Remarks"
(d) Power:
(1) Horsepower developed
(2) Point of return of water to stream
5. The water is to be diverted from its source at the following point within the SW4 SE4 of Section 29, Describe as being within a 40-acre subdivision of public T 22N D 26E M D B & M on at a point from which the South & company of
T.33N., R.36E., M.D.B. & M. or at a point from which the South 1/4 corner of survey, and by course and distance to a section corner. If on unsurveyed land, it should be so stated. Section 29, T.33N., R.36E., bears S 40 W 400'.
6. Place of use All of Sections 19, 20, & 29; E of Section 30, T.33N., R.36E., M.D.B. of Describe by legal subdivision. If on unsurveyed land, it should be so stated.
7. Use will begin about January 1st and end about December 31st , of each year.
Month and Day Month and Day Month and Day 8. Description of proposed works. (Under the provisions of NRS 535.010 you may be required to submit plans and
specifications of your diversion or storage works.) well. pump, motor, pipelines. State manner in which water is to be diverted, i.e. diversion structure, ditches and
flumes, drilled well with pump and motor, etc. 9. Estimated cost of works \$30,000.00

10.	Estimated time required to construct works. 3 years If well completed, describe works.
11.	Estimated time required to complete the application of water to beneficial use 5 years
12.	Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use.
	Water Usage: See Attached.

BECAUSE OF FAILURE

OF APPLICANT TO COMPLY WITH THE PROVISIONS OF PERMIT

CANCELLED

Page 2 48773

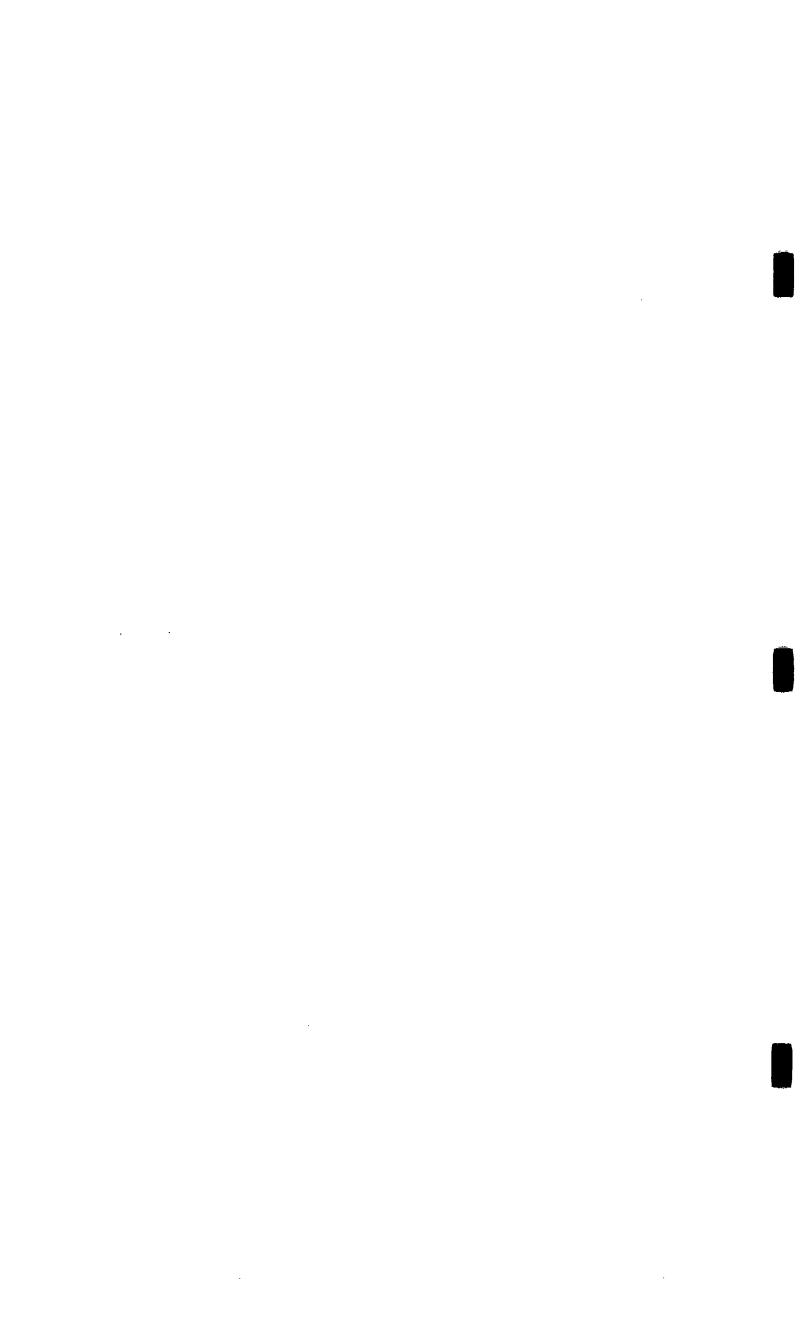

(PERMIT TERMS CONTINUED)

The total combined duty of water under Permits 46712, 46925, 46926, 46927, 46929, 46930, 46931, 48769, 48770, 48771, 48772, 48773, 48774, 48775 and 48776 shall not exceed 288.75 million gallons annually.

This permit is issued under the preferred use provisions of NRS Chapter 534. The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The state of the second second

Water Usage:

1. Care 4.

5,000 G.P.M. = 300,000 gallon per hour
10 hour per day x 300,000 gallon = 3,000,000 gallon per day
3,000,000 gallon per day x 25 days month = 75,000,000 gallon
 per month
75,000,000 gallon per month x 11 months = 825,000,000 gallon

per year

Anticipated water loss factor is 35% of total water usage. Considering this formula make up, water per hour is 105,000 gallons.

per day - 1,500,000 gallon per month - 26,250,000 gallon per year - 288,750,000 gallon

Our plant is designed to run 1,000 yards per hour of bank run ore to be washed and processed.

Our recycling and conservation of water plans are the following:

- Two to three settling ponds to catch run off water from our washing plant.
- 2. Sand screws to remove excess water from processed gravels.
- If economics allow, cyclones to remove silts and conserve on water.

A number of variables to the above plan is:

- That our plant has capabilities of running up to 1,500 yd. per hour under ideal material condition (i.e.-not too much clay, favorable % ratio of fines to larger rock, etc.)
- That during long, hot summer months we would run two 8 hour shifts instead of a 10 hour shift, more water usage.
- 3. The heat of an extra hot or extra dry summer could consume through evaporation, a figure higher than 35% water loss.

Thank you,
